Address : 304, Advance Enclave 1A, near Asaram bapu ashram, Shirgaon Badlapur (E).

### Project Designs

#### Smart Home Application

It is an IoT enabled Mobile Application in which various things such as lightning, fan, lamp, switches are connected to the mobile allowing user to monitor and control them regardless of time constraint. This assist us in making our home more safe, secure and automated.

#### Attendance Management System Using Face Recognition.

"Attendance Management System using Face Recognition" is a desktop based Standalone application. It is the simple user-friendly application which will assist us to mark the in-time and out-time attendance. It will store details of the employee or student, Including the data of in-time and out-time entries this application will also store the ID, NAME, DATE and TIME of the attendance so that admin can easily search for the particular employee for his or her presence.
